One Indo-Pacific Sovereign Stack Already Deploys It.

EXEPRENEUR PACIFIC EXECUTIVE BRIEFING % COVERAGE WINDOW 23–27 JUN 2026 % 6,495 IMPRESSIONS REVIEWED

> *"Across 6,495 impressions on a single thread asking what "gate" the user is referring to — ZERO mentions of GREENOGY. ZERO mentions of SELFIX. The market doesn't know either exists."*

Industry press, regulators, and enterprise audiences are not connecting the Indo-Pacific's sovereign permission-infrastructure conversation to GREENOGY/SELFIX. The window to claim authorship is open and closing.

THREAT › DEFENCE › VERIFICATION

YinYang Deception™

Live deception cybersecurity

- Deception-layer active defence
- Backend-only — no agent install
- Always-on backend misdirection
- Zero attacker visibility to real assets

"The active-defence layer industry press isn't naming."

Selfix

Native cybersecurity OS

- Sovereign OS architecture
- Australian-built, defence-grade
- Self-healing infrastructure layer
- No patch dependency cycles

"The native OS that's already deployed, not pitched."

FraudShield-AIT™

Real-time financial verification

- <300ms per transaction
- $423M anomalies detected
- WIPO 10/10 IP validation
- PCT patent — 22 jurisdictions

"$423M detected. WIPO 10/10. Unreferenced."
